Addressing the Israeli treatment of Palestinians in occupied Palestinian territory and throughout Israel

GA4

Issue Description:

The war between Isreal and Palestinians has been raging for multiple years. The conflict causes a lot of victims and people in the need of help on both sides of the conflict. However, Palestinians are given none or very limited help. Economic, social, medical and basic necessities are needed to survive and live a normal life. Sadly, Isreal does not help Palestinians a lot, most help that arrives is international.

Why has this issue not been resolved?

International help is given to Palestinians. For example, trucks full of supplies are driven from Egypt to Palestina. Sadly, Isreal blocks most of these trucks, creating critical conditions for Palestinians, which sometimes causes severe hunger and thirst.

The war between Isreal and Palestina is a war which has been going on for decades. This cultivated hate for both sides towards each other. Countless debates, treaties and negotiations have been tried to solve this heated conflict, however nothing has worked out in the long term. Everything provoked even more hate to the other side. In the past, countries primarily supported Isreal or were neutral. However, in the last few years more and more countries have started showing support for the Palestinians, as the IDF and its war crimes seem to have no end.

Important stances on the issue

Describe some (extreme) stances of delegations or delegations severely affected by the issue (if relevant to the issue).

The US is recognized for being Israel's strongest ally, with Canada choosing the same side as the US. Germany, the UK, and France maintain strong diplomatic ties with Israel, though Canada, France and the UK have increased diplomatic support.

The Arab League and many states in the Middle East have shown their support to Palestine. (Think of Saudi Arabia, Iran, Qatar, Turkey, Egypt.) China has warned Israel, that if at any point atomic weapons be used on foreign territories, they will take action, and that peace in Gaza is of utmost importance. Others such as Brazil, Colombia, and Mexico have shown support to Palestinian sovereignty, and Colombia has already cut all trading ties with Israel.

What organizations are currently involved (or have been involved) and what have they achieved?

PAX for Peace, a Dutch organisation has collaborated with the Israeli and Palestinian Peace NGO Forum to create a two-state framework. The International Rescue Committee and

various other UN bodies have showed assistance. And not to forget the ALLMEP, which is an umbrella network consisting of 150 different Palestinian and Israeli peace organisations.

Explain what actions have already been taken.

There has been a minimal impact on the Palestinian grounds, as most actions that have been taken are legal actions. For example, there is an increasing amount of states recognizing Palestine, and other procedural deadlines have been set for Israel to defend the genocide case.
